

# ENGINEERING MANAGEMENT

A3C Management specialises in the provision of engineering services to help you manage and improve your processes. We ensure your operation is safe and meets the required health, safety and quality standards.

We work with you to solve your engineering challenges, lowering your costs where possible and providing you with pragmatic, straightforward advice.

## We can support your business in the following ways:

- Creation and implementation of safety critical and reliability centred maintenance regimes and service schedules
- Engineering lifecycle management
- Plant and operations reviews

## Our Approach

We support clients with a wide range of engineering management challenges such as excessive maintenance downtime as well as investigating persistent defect and breakdown trends. We are regularly approached by businesses looking for an independent outlook and clear-eyed assessment of their installation and advice on how your operation can be improved.

We take time to listen carefully and to understand the issues your business is facing in order to assess the root cause of your current challenges and implement the best solution for you, ensuring you have the right level of protection for your business.

Once we have a clear view of your expectations, we take a holistic and pragmatic approach to ensure you have:

- An accurate performance assessment of your current state and plan to make improvements
- The correct processes in place
- A workable preventative maintenance plan to ensure reliability without unnecessary costs associated with downtime

## HOW YOU WILL BENEFIT

- More efficient operations
- Less business interruption
- Lower repair costs
- Risk and performance-based maintenance regime
- Increased reliability
- Access to expertise you don't have in house
- Confidence in your operations
- Mitigated and reduced risk
